

BIN STRAP[®]

Keeping the Lid on Rubbish!

**Easy install...
Easy to use!**

Bin Strap is a new and innovative product which provides an elegant and attractive solution to keeping the lids on wheelie bins sealed and secure. Simple to install and easy to use, Bin Strap is an essential and practical device for the home.

When the wheelie bin is blown over in gusty weather, the contents stay in the bin and not strewn around the locality, causing annoyance to neighbours and local authorities. The alternative of placing rocks on bins to secure them is unsightly as well as a significant risk to health.

To tackle the problem of littering, County Councils will fine home occupiers and businesses if their wheelie bins cause littering, especially in built up residential areas. Bin Strap is the simple cost effective solution to reducing litter pollution, creating a greener, cleaner environment.

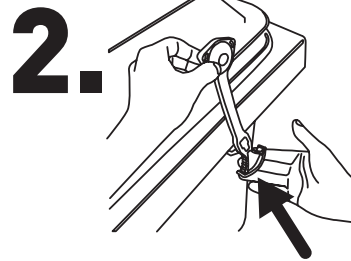

- **Easy to install & use**
- **Fits all sizes of wheelie bins**
- **Long lasting, strong & durable**
- **No more cleaning up spilt rubbish**
- **Keeps bin lid closed in stormy conditions & when tipped over**
- **No more using heavy rocks to keep bin lids closed. An unsightly & hazardous practice**
- **Prevents vermin getting at bin contents**
- **Guaranteed Irish**
- **Patent pending**

BinStrap comes pre-assembled.

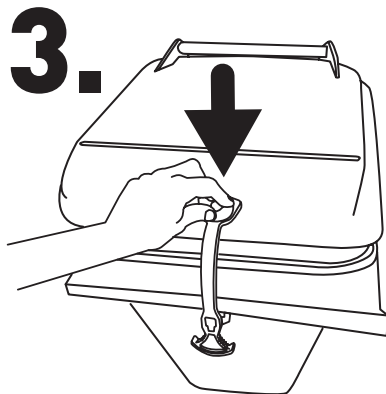

1. Remove adhesive backing from the BinStrap.

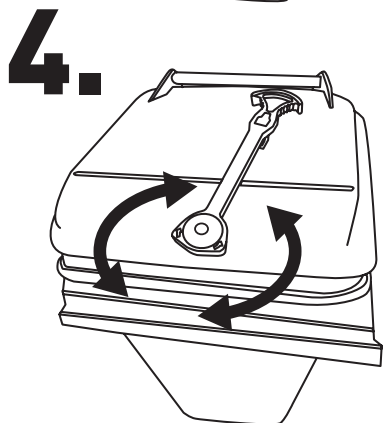

2. Ensure bonding surface of lid is clean and dry.

Hook the BinStrap under the top shelf of the wheelie bin.

3. Pull the BinStrap (not too tight) and press the adhesive down onto the wheelie bin lid for 15 seconds until a good bond is secured.

4. To help facilitate bin collection, unhook and rotate the Binstrap out of the way.

Release the Bin Strap by pulling handle down towards the ground.

Do not over-stretch the Bin Strap

Keep Bin Strap away from direct sunlight
